CONCEPT: PHYSICAL INVENTORY COUNT AND OWNERSHIP OF GOODS

Whether using perpetual or periodic inv	rentory systems, all companies must dete	rmine Inventory at the end of the period.
☐ A <i>physical count</i> involves act	ually counting and measuring all goods th	at are still in Inventory.
- Perpetual Inventory – th	ne count should the	inventory balance from the records.
> Any discrepand	cies can be explained by wasted materials	s, shoplifting, or employee theft.
- Periodic Inventory – a p	hysical count is	
• We may own some goods that are not i	n the warehouse.	
☐ FOB Shipping Point –	nt – of the goods changes hands at the shipping point	
- Any FOB Shipping Point in transit belong to the company.		
Supplier	Shipping Company	Our Varehouse
□ FOB Destination – of the goods changes hands at the destination		
- Any FOB Destination in transit belong to the company.		
Our Warehouse • We may not own some goods that are in	Company	Customer
□ Consigned Goods – Goods you are selling, but are owned by another company.		
- You do not own consigned goods, so they are part of your Inventory.		
- Generally, you earn some commission upon selling consigned goods.		
Jan's Boutique sells Sophie's dresses on consignment. Sophie pays Jan \$100 for each dress sold. At the beginning of the month, Jan's store displayed five of Sophie's dresses, with a cost of \$250 each. Jan sold two dresses during the month for \$1,000 each. Record Jan's journal entries related to the consigned goods. Journal Entry:
