CONCEPT: EQUITY METHOD INVESTMENTS

| When we have significant influence over another company, GAAP requires the use of the equity method | | | | | | | | |
|--|--|--|--|--|--|--|--|--|
| □ No influence → % ownership of common stock → use method | | | | | | | | |
| - If you own just a few shares of a company, you cannot influence any decision-making at that company | | | | | | | | |
| □ Significant Influence → % ownership of common stock → use method | | | | | | | | |
| - With enough common stock, you can influence who is voted onto the decision-making board of directors | | | | | | | | |
| □ Controlling interest → % ownership of common stock → use method | | | | | | | | |
| - With enough common stock, you can sway all the votes and have complete control of the company | | | | | | | | |
| - Consolidation accounting is beyond the scope of this course | | | | | | | | |
| • The equity method of accounting has four common journal entries that are made: | | | | | | | | |
| □ Purchase of Investment – when your company purchases enough shares to have significant influence | | | | | | | | |
| □ Net Income/Loss of Investee – your investment income is based on the net income/loss of the investee | | | | | | | | |
| □ Dividends Received – dividends received are investment income in the equity method | | | | | | | | |
| □ Sale of Investment – when you sell your investment, you take a gain/loss | | | | | | | | |
| - The amount of gain/loss is based on the difference between the selling price and book value | | | | | | | | |
| • A journal entry is recorded when the equity method investment is <i>purchased</i> : | | | | | | | | |
| On January 1, Year 1, Big Old Company purchased 50,000 shares of Small Boy Company's 125,000 outstanding shares of common stock at a market price of \$25 per share. | | | | | | | | |
| Journal Entry: | | | | | | | | |
| Assets = <u>Liabilities</u> + <u>Equity</u> | | | | | | | | |

Investment Income = % Ownership * Net Income of Investee

| • The company earns <i>investment income</i> based on their percentage ownership of the investee's net income: | | | | | | | | |
|---|--------------------|--------------|---------------|--|--|--|--|--|
| On December 31, Year 1, Small Boy Company reported a net income of \$560,000 | | | | | | | | |
| Journal Entry: | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| | | | - · | | | | | |
| <u>Assets</u> | = <u>Liabili</u> | <u>les</u> | <u>Equity</u> | | | | | |
| | | | | | | | | |
| • The company can also have an <i>investment loss</i> based on their percentage ownership of the investee's net loss: | | | | | | | | |
| On December 31, Year 2, Small Boy Company reported a net loss of \$100,000 | | | | | | | | |
| Journal Entry: | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| A | T 1 12 12 | , | | | | | | |
| <u>Assets</u> | = <u>Liabili</u> | <u>les</u> | <u>Equity</u> | | | | | |
| | | | | | | | | |
| • The company <i>reduces their investment asset</i> based on their percentage of investee dividends received: | | | | | | | | |
| In January Year 3, Small Boy Company declared and paid dividends of \$420,000. | | | | | | | | |
| Journal Entry: | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| <u>Assets</u> | = <u>Liabili</u> | <u>ies</u> + | <u>Equity</u> | | | | | |
| | | | | | | | | |

| Use a T-account to keep track of the balance in the Investment Asset account: | | | | | | | |
|--|------------------|------------------------|---|-----------------------------------|--|--|--|
| | | | | | | | |
| | | | | | | | |
| The company reports a gain on sa | ale of investmen | t if the selling price | | the book value of the investment: | | | |
| On January 2, Year 3, Big Old Company sold its investment in Small Boy Company for \$1,400,000 | | | | | | | |
| Journal Entry: | | | | | | | |
| | | | | | | | |
| <u>Assets</u> | П | <u>Liabilities</u> | + | <u>Equity</u> | | | |
| The company reports a <i>loss on sale of investment</i> if the selling price the book value of the investment: | | | | | | | |
| On January 2, Year 3, Big Old Company sold its investment in Small Boy Company for \$1,100,000 | | | | | | | |
| Journal Entry: | | | | | | | |
| | | | | | | | |
| <u>Assets</u> | = | <u>Liabilities</u> | + | <u>Equity</u> | | | |
| | • | | · | | | | |

PRACTICE: On January 3, Johnson Corp acquired 35% of the outstanding common stock of Small Company for \$350,000. For the year ended December 31, Small Company reported net income of \$150,000 and paid cash dividends of \$70,000 on its common stock. At December 31, the carrying value of Johnson Corp's investment in Small Company under the equity method is:

- a) \$322,000
- b) \$350,000
- c) \$378,000
- d) \$398,000

PRACTICE: On January 4, The Jones Company purchased 35,000 out of the 87,500 outstanding shares of Miller Company for \$400,000. During the year, the Miller Company reported net income of \$240,000 and paid cash dividends of \$60,000, while the Jones Company reported net income of \$450,000 and paid cash dividends of \$80,000. What is the carrying value of Jones Company's investment in Miller Company at the end of the year under the equity method?

- a) \$400,000
- b) \$472,000
- c) \$496,000
- d) None of the above

PRACTICE: GT Company owns 9,000 of the 48,000 shares of outstanding common stock of Bell Company. GT Company should account for this investment using the:

- a) Market method
- b) Equity method
- c) Lower-of-cost-or-market method
- d) Consolidation method
