

## CONCEPT: INTRODUCTION TO THE TYPES OF CULTURE MEDIA

- *Recall:* Culture media is a *solid* or *liquid* preparation of nutrients used to grow microbes in a lab.
- Types of *culture media* are classified by their \_\_\_\_\_ & \_\_\_\_\_ in research.
- There are \_\_\_\_\_ classes of growth media used in microbial research:

**PRACTICE:** Which of the following is NOT a type of culture media?

- Differential media.
- Descriptive media.
- Complex media.
- Reducing media.

**PRACTICE:** Which type of culture media is used to grow cells anaerobically?

- Complex media.
- Enrichment media.
- Reducing media.
- Selective media.
