

CONCEPT: INTRO TO GLYCOLYSIS

- Carbohydrates undergo enzymatic _____ in stage 1 catabolism to produce glucose.

Intro to Glycolysis

- Glycolysis is part of stage 2 of carbohydrate catabolism.
 - _____ glucose to yield pyruvate and high-energy molecules (ATP and NADH).

EXAMPLE: Which one of the following molecules is not a product of glycolysis?

- a) Pyruvate
- b) NADH
- c) ATP
- d) Acetyl CoA
