

**TOPIC: Hyperbolas NOT At The Origin**  
**Graphing Hyperbolas NOT At The Origin**

- To graph hyperbolas NOT at the origin, shift points by  $(h, k)$

Horizontal Hyperbola		
$\frac{x^2}{a^2} - \frac{y^2}{b^2} = 1$		$\frac{(x - h)^2}{a^2} - \frac{(y - k)^2}{b^2} = 1$

**EXAMPLE:** Graph the following hyperbola.

$$\frac{(y - 1)^2}{9} - \frac{(x - 2)^2}{16} = 1$$

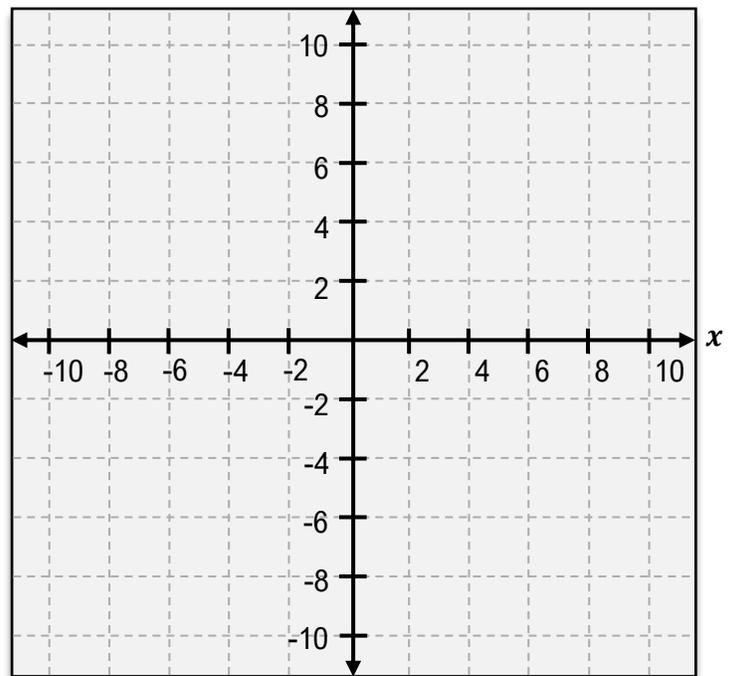

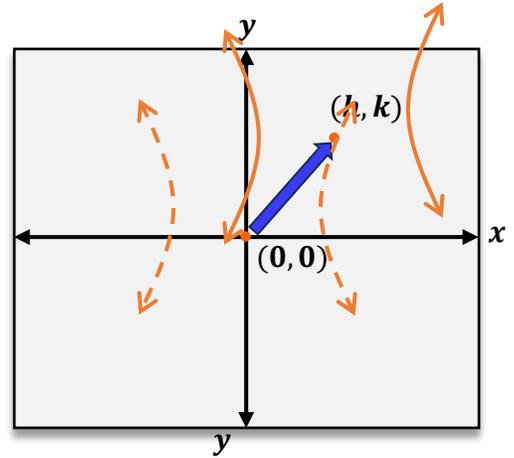

TO GRAPH

- 1) Hyperbola is [ HORIZONTAL | VERTICAL ]
- 2) Center  $(h, k)$ : ( \_\_ , \_\_ )
- 3) **Vertices** horiz.  $\rightarrow (h \pm a, k)$ , OR vert.  $\rightarrow (h, k \pm a)$ :  
 ( \_\_ , \_\_ ) & ( \_\_ , \_\_ )
- 4) **b points** horiz.  $\rightarrow (h, k \pm b)$ , OR vert.  $\rightarrow (h \pm b, k)$ :  
 ( \_\_ , \_\_ ) & ( \_\_ , \_\_ )
- 5) Asymptotes:  
 (A) draw a box through **vertices** & **b points**  
 (B) draw lines through box corners
- 6) Draw branches at **vertices** & approaching asym.

FROM GRAPH

- 6) Foci horiz.  $\rightarrow (h \pm c, k)$ , OR vert.  $\rightarrow (h, k \pm c)$ :  
 ( \_\_ , \_\_ ) & ( \_\_ , \_\_ )

Circle	Ellipse	Parabola	Hyperbola

**TOPIC: Hyperbolas NOT At The Origin**

PRACTICE: Describe the hyperbola  $\frac{(x+2)^2}{9} - \frac{(y-4)^2}{16} = 1$ .

- (A) This is a *vertical* hyperbola centered at  $(-2,4)$  with vertices at  $(4,2), (4,-6)$  and foci at  $(4,4), (4,-8)$ .
- (B) This is a *vertical* hyperbola centered at  $(2,-4)$  with vertices at  $(4,1), (4,-5)$  and foci at  $(4,3), (4,-7)$ .
- (C) This is a *horizontal* hyperbola centered at  $(-2,4)$  with vertices at  $(2,4), (-6,4)$  and foci at  $(4,4), (-8,4)$ .
- (D) This is a *horizontal* hyperbola centered at  $(-2,4)$  with vertices at  $(1,4), (-5,4)$  and foci at  $(3,4), (-7,4)$ .

PRACTICE: Describe the hyperbola  $y^2 - \frac{(x-1)^2}{4} = 1$ .

- (A) This is a *vertical* hyperbola centered at  $(1,0)$  with vertices at  $(1,1), (1,-1)$  and foci at  $(1,\sqrt{5}), (1,-\sqrt{5})$ .
- (B) This is a *vertical* hyperbola centered at  $(1,0)$  with vertices at  $(1,2), (1,-2)$  and foci at  $(1,1), (1,-1)$ .
- (C) This is a *horizontal* hyperbola centered at  $(-1,0)$  with vertices at  $(0,0), (-2,0)$  and foci at  $(\sqrt{5}-1,0), (-\sqrt{5}-1,0)$ .
- (D) This is a *horizontal* hyperbola centered at  $(1,0)$  with vertices at  $(0,0), (-2,0)$  and foci at  $(1,\sqrt{5}), (1,-\sqrt{5})$ .
